

Primary PE and Sport Premium Impact Statement July 2023

NINE ACRES PRIMARY SCHOOL

The DfE vision is for all pupils leaving primary school to be physically literate and with the knowledge, skills and motivation necessary to equip them for a healthy lifestyle and lifelong participation in physical activity and sport. The Primary PE and Sport Premium Funding has been provided to ensure impact against the core objective of achieving self-sustaining improvement in the quality of PE and sport in primary schools.

It is expected that Nine Acres Primary School will see ongoing improvement against the following 5 key indicators:

1. the engagement of all pupils in regular physical activity
2. the profile of PE and sport being raised across the school as a tool for whole school improvement
3. increased confidence, knowledge and skills of all staff in teaching PE and sport
4. broader experience of a range of sports and activities offered to all pupils
5. increased participation in competitive sport

Schools must use the Primary PE and Sport Premium Funding to make additional and sustainable improvements to the quality of PE and sport that is offered by:

- Developing or adding to the PE and sport activities already offered by the school.
- Building capacity and capability within the school to make sure that improvements made now will benefit pupils joining the school in future years.

The area in which our school is located is among the 20% most deprived areas in England and 'The Index of Multiple Deprivation' (IMD) provides a much wider measure of deprivation, which is constructed from data relating to seven different 'domains': income deprivation, employment deprivation, health and disability deprivation, education and training deprivation, barriers to services, the living environment and crime.

- 44% of pupils live in areas that are amongst the 20% most deprived for 'Living Environment'. This measure also has the highest 'average rank' (23rd percentile).
- 36% of pupils live in areas that are amongst the 20% most deprived for 'Crime'.
- 26% of pupils live in areas that are amongst the 20% most deprived for 'Health'.
- 21% of pupils live in areas that are amongst the 20% most deprived for 'Education'.
- Many of our pupils live in households within the bottom 10% measure of employment deprivation in England
- Our pupils live in households where household income is amongst the lowest 20% in England – increase in our pupil premium is also evident as a result of job loss and economic crisis pandemic
- Many of our pupils are from families where the lack of attainment and skills of adults is within 10% worst in England
- Only 9% of Nine Acres pupils come from Black and Minority Ethnic backgrounds and very few have English as an additional language. This reflects the low BME populations on the island as a whole. However, 'inwardly mobile' children (those who join school after reception) are much more likely to be from BME backgrounds and to have English as an additional language.
- Inward mobility rates are higher than average, and as well as being more likely to be from BME backgrounds, the children who join Nine Acres after Reception are more likely to be Disadvantaged, to have SEN and to live further away from school.

Under the Ofsted Schools Inspection Framework, inspectors will assess how effectively leaders use the Primary PE and Sport Premium Funding; measure its impact on outcomes for pupils and how effectively governors hold leaders to account for this. Schools are required to publish details on their school website of how they spend this funding and the effect it has had on pupils' PE and sport participation and attainment. Nine Acres Primary School is proactive in promoting the Chief Medical Officer Guidelines that recommend that all children and young people aged 5 to 18 engage in at least 60 minutes of physical activity a day, of which 30 minutes should be in school.
