

4th-10th October is SPACE WEEK!

Next week Nine Acres is joining thousands all over the world celebrating World Space week. This year, the focus is ‘Women in Space.’

We will be celebrating with a special assembly about

women in space, some interactive guides to the night sky for all, a science show and space journals. If you want to explore the night sky at home with your child there are some great free apps to download on your phone: Point your phone up to the night sky and see what’s above your heads. Look out for constellations, planets, the International Space Station and more!

Sky Map – Android

Night Sky – iPhone

Stellarium – Android

Or you can scan this QR code to get your map of the night sky!
